

NEED A DATA DIAGNOSTIC?

Why? The Marketer's Challenge:

The modern day marketer faces many challenges in an effort to prove and improve meaningful business impacts.

Challenge #1 Ability to produce accurate, timely, meaningful data & reports:

Meaningful Reports: the right data and reports to deliver meaningful insights and data driven decisions.

Accuracy = Credibility: scrub, de-dup, audit & automate to objectively verify- deliver credibility.

Data Connections: connect & correlate all marketing data, semi-automated and fully automated w/ APIs.

Granularity: drill down into business question after business question, n-dimensional.

Speed: w/data automation deliver reports that enable data driven analysis, insights and action on demand.

Challenge #2 Unlock meaningful analysis, insights and action:

Business

What is my return on marketing investment? Forecasted revenue from marketing activity? How is marketing affecting funnel quality & velocity?

Marketing

What should I spend on marketing to drive quality leads (cost/p): C/MQL, C/SQL, C/Closed Won. Attribution, what campaigns, channels, content produced qualified leads and sales?

Customer

Who are my best prospects, what resonates and how do I attract more? Why do our best prospects engage with us?

THE DATA DIAGNOSTIC VALUE:

STEP 1

Data Consultation

Leverage a seasoned data & business expert in a complimentary one hour consultation to assess your current data maturity opportunities.

Uncovering:

Requirements & Business questions - what do you want to understand?

Configuration and Tech Audit - can your tech support your ability to answer the business questions?

Data Profiling and quality audit - is your data accurate + high quality enough to answer the questions?

Business Process audit - does your business process support answering the business questions?

Benefits:

Ensure accurate data capture for more reliable insights.

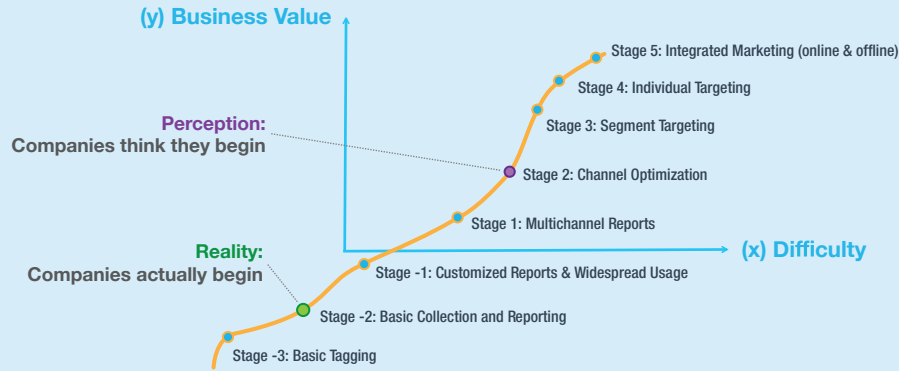

Ensures your organization's business processes are aligned with your measurement goals.

STEP 2

Data Maturity Assessment Reality

Understand where you stack up against your fiercest competition.

STEP 3

Analytics Diagnostic

*What needs to be fixed with your current, specific web analytics configuration. As the first step in helping you along your data maturity journey.

Uncovering:

Key issues in your setup - Examination of tracking code deployment and goals & funnels audit.

Supplementary features - Demographic & industry benchmarking enablement.

Baseline performance review - A snapshot of your month-on-month performance.
